Sex, Gender and Alcohol The prevalence of alcohol use, and alcohol use related disorders, tends to be higher among boys and men. However, the gender gap appears to be narrowing. Recent evidence demonstrate that there is a greater increase in rates of alcohol use disorder and binge drinking among girls and women compared with boys and men[1,2]

According to widespread beliefs, the consumption of alcohol led to increased sexual activity among both men and women, and it also led to disorderly conduct among women and violent conduct among men. Dr Lynn shows how alcohol was a fundamental part of the diets of most people, including women, resulting in daily drinking of large amounts of ale, beer,
