Ch 19 : Campbell Biology Chapter 19: Viruses - Study.com

Chapter 19: Viruses . Overview . Experimental work with viruses has provided important evidence that genes are made of nucleic acids. Viruses were also important in working out the molecular mechanisms of DNA replication, transcription, and translation. Viruses have been important in the development of techniques of manipulating and transferring genes.

Chapter 19: Viruses - BIOLOGY JUNCTION

BIOLOGY I: Chapter 19 - Viruses. Viral Structure (Anatomy): The Inner Core of Nucleic Acid. A virus contains only one type of nucleic. acid, DNA orRNA, as part of their inner core. In contrast, in prokaryotic and eukaryotic cells, DNA is always the primary genetic material. and RNA plays an auxiliary role.
