### What is Coping Theory? - PositivePsychology.com

In other words, deducing the mechanism through which coping affects health outcomes aids in answering the more basic question of whether coping is primarily a function of personality or is a joint expression of the effects of both the person and the situation." (p. 165 from "Stress, Coping, and Development" by Carolyn M. Aldwin)

### Stress, Coping, and Development, Second Edition: An ...

Abstract. Despite consensus that development shapes every aspect of coping, studies of age differences in coping have proven difficult to integrate, primarily because they examine largely unselected age groups, and utilize overlapping coping categories. A developmental framework was used to organize 58 studies of coping involving over 250 age comparisons or correlations with age.
