Start by launching FactoryTalk View Studio Machine Edition. Once the software loads, the user will be presented with a screen that allows them to work on an existing application or to create a new one. We will be creating a new application; click on the “New” tab at the top of the window.

Getting Started in FactoryTalk View ME HMI Development

Late last week Rockwell Automation released version 8.1 of FactoryTalk View Machine Edition. The recommended computer specs for running ViewME 8.1 include: Intel Pentium 4 2GHZ, 2GB of RAM, and 2GB of Hard disk space. Note: Personally, I think these specs are too low! I would recommend using the ones for Studio 5000 27 instead.
