### Holt McDougal Physics Chapter 16: Electric Forces and ...

This attraction explains why negative electrons keep moving around the positive nucleus of the atom. Like charges, on the other hand, repel each other, so two positive or two negative charges push apart. This is also shown in the diagram. The attraction or repulsion between charged particles is called electric force.

### Electric Charge and Electric Force ( Read ) | Physics | CK ...

Electric Force Two charged objects near one another may experience acceleration either toward or away from each other because each object exerts a force on the other object. The closer two charges are, the greater is the force on them.
