Mf 10 Baler Manual. Your goal should be to make the position and actions of the 'bad' one duplicate those of the 'good' one. You might want to read the manual again more closely. The manual should be telling you to bend the 'wiper arm' if and only if the wiper does not contact the billhook foot. The knot is actually scraped off the billhook.

The knotter on a Massey Ferguson baler is what ties the twine. This component can be adjusted by changing the density of the bale, which affects its weight. The knotter has rotating discs that make loops out of the ends of the twine, and a needle on the baler wraps the twine around the bale.
