Graph each formula of the piecewise function over its corresponding domain. Use the same scale for the x x-axis and y y-axis for each graph. Indicate inclusive endpoints with a solid circle and exclusive endpoints with an open circle. Use an arrow to indicate  $-\infty$  or  $\infty$ . Combine the graphs to find the graph of the piecewise ...

The learner will write and graph linear equations, evaluate and find the domains and ranges of functions, and graph functions and their transformations. An equation in x and y defines a relationship between the two variables. The equation may be represented as a graph, providing another perspective on the relationship between x and y.

Use factoring to find zeros of polynomial functions Find zeros of polynomial functions. Recall that if f is a polynomial function, the values of x for which  $f(x)=0$  are called zeros of f.If the equation of the polynomial function can be factored, we can set each factor equal to zero and solve for the zeros.
